

Connect-it Power 4-way & 6-way 10A

Audiophile power strip

- Especially for use with audio equipment
- No sound degradation through filters or overload protection
- C13 power input (compliant to IEC 60320 standards)
- Extended connector distance for use with big power supplies
- Magnetically shielding by 0,8mm metal casing
- Optimised cooling and fire protection
- Available with 4 or 6 AC outlets (EU, UK, France-CZ, US)
- Maximum continuous current 10 amperes
- High-quality AC-outlets (nickel-plated brass)
- High quality inner cabling (1,5mm²), crimped not soldered
- Detachable 1,5m standard power cord 10A supplied
- Handmade in EC

INPUT:	C13
OUTPUT:	4way EU, France-CZ, UK, US 6way EU, France-CZ,UK, US
INNERCABLING:	1,5mm ² NKT
CURRENT (continuous):	10 Ampere for complete power strip
SAFETY CERTIFICATION:	IEC EN 60320
COLOUR:	grey
DIMENSIONS (WHD):	286 x 73 x 53 mm (4-way) 402 x 73 x 53 mm (6-way)
WEIGHT:	730 g Connect-it Power 4-way 980 g Connect-it Power 6-way

No filtering or overload protection, just pure power transmission, best connectivity & magnetic shielding!

Connect-it Power 10A power strips are built to make best possible connection between a hifi system and mains power. No filtering or overload protection inside! This successfully avoids any sound degradation through low-cost components and guarantees pure power transmission. Each power strip is equipped with an IEC C13 input connection and 4 or 6 mains outlets. A full metal body ensures that electromagnetic interferences have no chance for electromagnetic interferences. Every power strip has its own IEC plug, that allows use of other power cords with desired length. Of course a 1,5m power cord (IEC > EU, France-CZ, UK, US) is included. As an optional upgrade *Connect-it Power cable 10A* made from pure copper is available in 4 different lengths (EU, France-CZ, UK, US versions), see detailed product information.

Optional upgrade:

Connect it Power cable 10A

Available lengths:
1,0 / 1,5 / 2,0 / 3,0m
