

# PRO-JECT 2 XPERIENCE

Starting with the Pro-Ject, this is the cheapest deck on test coming in at just over half the price of the Michell so obviously it will be completely outclassed in this company, correct? Sorry - wrong! Frankly, I don't know how Pro-Ject does it, but the amount of performance and sheer value for money that this turntable offers is astounding.

On its own, the turntable and arm are a very fine combination but when one considers that a good quality MC cartridge is also thrown in, the deal is almost done then and there!

In performance terms I find that you always know what a Pro-Ject will deliver and I mean this in the best possible way.

The **2 Xperience V-Pack** continues the company's traditions of offering a well balanced and musical performance that anyone can enjoy.

Its minor sins are far from obvious and never detract from the fine performance of a very capable.

## HI-FI WORLD

**VERDICT** ●●●●● £

Super value for money package that offers a tidy and musically satisfying performance.

**FOR**

- good upper bass detail
- fine midband insight
- smooth top end
- ease of setup

**AGAINST**

- low bass lacks impact
