

DAC BOX TV

Digital to analogue converter

MSRP 99 € (incl. VAT)

- Audio-upgrade for TV, Sat, Computer ...
- 24bit/192kHz Cirrus Logic DAC chip
- Supports 24bit audio data
- Up to 192kHz sampling rates
- Automatic signal sensing technology
- Low clock jitter sensitivity
- RCA connectors gold plated (in & out)
- Metal casing protects against vibration and interference
- Black casing only

D/A-converter: Cirrus Logic CS4344 (Delta-Sigma type)

Sampling rates (coax): 32/44, 1/48/88, 2/96 kHz,

Sampling rates (optical): 32/44, 1/48/88, 2/96 kHz

Digital inputs: 1 x coax (S/PDIF)

1 x optical (Toslink®)

Dynamic range: 105dB

Analogue out: 1 pair RCA/Cinch

Output voltage: 0,7 Veff

Output impedance: < 100 ohms

THD: -90dB

Power consumption: < 1 watt standby, 200mA max

Power supply: 5V/1000mA DC; 220 - 240V, 50Hz

Dimensions W x H x D: 107 x 30 x 64 (75) mm (incl. sockets)

Weight: 290g without power supply

Get awesome quality music from your computer, TV and other digital devices

Modern TV's, Bluray-players, Satellite receivers, game consoles aso are multifunctional, Bluray-players are able to play CDs and Sat receivers can play radiostations. Unfortunately they often offer no or bad quality analogue interfaces for connecting these to hifi/audiosystems. By adding the all new and compact DAC Box TV for less than €100,you can make your Blurayplayer, Apple Macs, PCs, TVs

or settop boxes a real hifi source and avoid to buy bulky and expensive surround amplifiers. DAC Box TV works by taking a direct digital audio signal from your device - before its own soundcard or DAC can do this. It digitally processes the audio signal using our custom designed technology, dramatically improving sound quality and reducing distortion. Subtle detail, sparkling clarity and a real sense of scale and drama never before was available for less!
