The high-quality Rack it system offers a modular, neat & stylish storage solution. In contrast to cheap rack solutions from furniture chains, our Rack it system features a sturdy wood construction. Moreover, each element is handcrafted in Austria.

Rack it is a modular system and can therefore be specifically tailored to your needs. Its basic element - the Rack it Basic Cube - can either be stacked or placed next to each other. One Rack it Basic Cube can hold approximately 150 of your LPs. To add even more flexibility, the Rack it Basic Cube can be extended with the Rack it shelves. These feature a supporting rod to provide your CD/DVD/Bluray collection a perfect housing. In addition, Box Design components can also be placed on these shelves, offering a neat solution to hide cables and power supplies. That way your Box Design units appear always at their best. If sensible audio equipment (e.g. a turntable) is placed onto a Rack it Basic Cube or in a shelf, the separately available Damp it rubber feet isolate them efficiently from structure-born noise. We offer a wide range of modern colours in two fi-

nishes (matt/high gloss) so that you can create the perfect modular storage solution.

Rack it adds a stylish and contemporary feel to your home or office - simply & universal!
