

XTENSION 9 S-SHAPE

Highend turntable with top class 9" S-shape tonearm

n/c MSRP 2495 € (incl. VAT)

Colour Options:

- Heavy 16 kg belt drive turntable
- Mass loaded magnetic floating subchassis
- Precision balanced sandwich-platter
- Inverted ceramic ball bearing with magnetic support
- Heavy weight record clamp
- Heavy MDF chassis with high mass and low levels of resonance
- Electronic speed control 33/45 rpm
- 9" S-shape aluminium tonearm
- Inverted tonearm bearings (ABEC 7 quality)

Speed: 33 / 45 rpm (electronic speed change)
Acrylic dust cover: yes
Pro-Ject tonearm cable included: Connect it 5P-E 1,23m
Aluminium feet: Magnetic supported & TPE damped
Turntable main bearing damping: heavy weight metal block
Max. speed variance: $\pm 0,09\%$
Max. wow and flutter: $\pm 0,01\%$
Rumble: 73dB
Platter weight/diameter: 5,4 kg/300mm
Platter puck weight: 800gr
Effective arm length / overhang: 230mm / 18mm
Effective tonearm mass: 8,5g
Tracking force range: 0-25mN
Cartridge weight range from: 4 - 14g
(4 different counterweights included)
External power supply (prim/sec): 220 - 240V/50Hz / 15V/1600mA DC
Power consumption: 4W (max.) / < 1 watt standby
Dimensions WxHxD: 465 x 185 x 350 mm lid closed
Weight: 18kg

Superlative vinyl performance from a compact luxurious turntable/arm configuration!

Xtension 9 S-Shape incorporates all our turntable design experience from more than 25 years in a slim-line size to fit standard audio racks. Xtension 9 chassis is made from MDF filled with metal granulate, that gives high mass and is non-resonant. Magnetic feet, which decouple the main plinth from its base, are combined with a weighty 16kg total turntable mass. The result is a unique combination of ,mass loaded' and ,floating turntable' design principles. Instead of pure metal for the main platter, we've found a perfect alloy which we damped on with thermo plastic elastomers (TPE). Additionally we've glued recycled Vinyl records to the top (which act as a perfect mat) and

bake this ,sandwich' before precision balancing it. The final product subsequently benefits from a wonderfully resonance-free, heavy platter, that runs ultra-silently on an inverted ceramic ball bearing with magnetic suspension. Pro-Ject Xtension 9 S-Shape includes a topclass highend S-Shape aluminium tonearm and comes complete with a beautiful dustcover. The top grade aluminium S-Shaped tonearm convinces with a harmonic, musical and engaging sound. Because of the detachable headshell it is very easy to swap out cartridges. For your daily use you can utilize an MM system and for the pure listening pleasure you can change to an MC system.
