Speaker Box 5 DS2: Price-Performance-King

Speaker Box 5 DS2 offers a balanced and harmonic sound through the entire spectrum. These one of a kind bookshelf-speakers deliver a deep stretching bass, full-bodied and lush mids and clear and impressive treble. The sound stage is three dimensional realistic displayed and instruments are placed with high accuracy. The audiophile soundsignature of Speaker Box 5 DS2 convinces with a relaxed and laid back playback, though it never loses control over the speed in the lows, with which the rhythm is ensured.

Speaker Box 5 DS2 is entirely made in Europe and comes in three noble wooden finishes: walnut, eucalyptus and rosewood. These different wood-tones easily blend into any furnishing. Every speaker of ours has to withstand extreme-condition tests to ensure they fit our highest standards. A very special, resistant and ecofriendly glue has been used to hold the cabinet together and to avoid any leakage. Speaker Box 5 DS2 is recommended for rooms up to 25m² and offers unrivaled sound at an unbeatable price!

Pro-Ject speakers - high quality and timeless

A lot of speaker manufacturers have lost the real tradition of european craftsmanship in the past decades. Before the millenium almost 90 percent of all loudspeakers, in any price-range, have been made in either Europe or the USA. Today nearly 99 percent of speakers up to 4000€ are made in far-east. The trend also went into a direction where speakers have been over-designed with extravagant looks and low-quality materials. Unfortunately a

majority today is made of resonant particleboard, is covered with strange lacquers or even plastic! Even though these materials are very cheap the prices for the speakers go stadiily up. In tradition of the Pro-Ject philosophy we have kept our S2 and DS2 speakers as simple and elegant as possible, with beautiful real wood veneer, top notch components and best build-quality! Take as an example our extreme precisely made corners. All in favour of the sound and a timeless design!
