1 x 5V/1A (USB A)

Dimensions W x H x D: 106 x 37 x 103mm

Weight: 360 g without power supply

Power Box S2 - Triple output power supply!

Power Box S2 is a very efficient and flexible power filter for S2 line products. By placing the power supply outside of the main component, potential noise and audio signal contamination is avoided. Clean energy contributes significantly to the sound quality and Power Box S2 can make a huge difference when comparing the system with and without it. Its three outputs can

power multiple units, such as power amplifiers, streamers, turntables, DACs tuners etc. The sophisticated DC filtration can have a dramatic impact on the sound quality. Additionally, to the sound improvements Power Box S2 also offers its users a cleaner cable solution avoiding PSU and cable mess.
