

2Xperience DC Acryl

Top-grade turntable with 9" EVO tonearm

n/c MSRP 999 € (incl. VAT)

2M silver MSRP 1099 € (incl. VAT)

- Electronic speed control with ultimate speed stability
 - Precision balanced sandwich-platter with vinyl mat
 - Record clamp tightens record to platter
 - Transparent acrylic chassis
 - Audiophile grade 9" EVO carbon tonearm
 - Inverted tonearm bearings (ABEC 7 quality)
 - Available with or without 2M Silver phono cartridge
- 2M Silver cartridge with silver voice coils

Speed: 33, 45 (electronic speed change)
Drive principle: belt drive
Platter: 300mm MDF
Mains bearing: stainless steel
Wow & flutter: +/- 0,08%
Speed drift: +/- 0,3%
Signal to noise: 70dB
Tonearm: 9" Carbon EVO
Effective arm length: 230 mm
Effective arm mass: 8,5 g
Overhang: 18 mm
Tracking force: 10 - 30mN
Included accessories: 15 volts DC / 800 mA power supply, dust cover
Power connection: 110/120 or 230/240 Volt - 50 or 60 Hz
Power consumption: 4 watt max / < 0,5 watt standby
Dimensions: 460 x 133 x 360 mm (WxHxD) lid closed
Weight: 7,2 kg net

Outstanding performance from a compact and luxurious turntable configuration

2Xperience DC Acryl is based on the 2Xperience belt-drive concept which incorporates over 20 years of turntable design experience. The addition of precision motor control and a highend 9cc Evolution carbon fiber tonearm means playback quality is vastly improved. The acoustically inert chassis is made from transparent acrylic. The turntable platter is built with heavy, non-resonant materials in a precisely balanced sandwich configuration. A vinyl layer acts as the perfect turntable mat.

A screwable and light-weight record clamp eliminates unwanted record vibration and rumbling of the main platter bearing. The audio performance of the final product benefits from the resonance-free platter, avoiding the ringing effect of common metal and glass platters.

The 2Xperience DC Acryl is not only equipped with a highend tonearm, but comes on request with a pre-fitted Ortofon 2M Silver magnetic cartridge that makes use of silver voice coils. An acrylic dust cover is also included. While audio electronics are often hidden and controlled by phone or tablet apps, the analog record player again is put in scene as the center of a hifi system and proudly presented like high-quality speakers.
