

Pro-Ject presents the Ortofon Century Anniversary-Turntable

It is a great honor and pleasure for us to present our new Anniversary-Turntable, the Ortofon Century.

100 Years Ortofon

Our long-time partners and friends of Ortofon have the incredible jubilee of 100 years. Not many companies can say that they have been the industry leader in their field and managed to exist for such a long time. We are very happy to be able to celebrate their existence of one

full century together. We are thrilled to release the Ortofon Century turntable in conjunction with Ortofon.

Built on The Classic SB it has a few tweaks which result in even better performance. We took the already incredible Classic SB and exchanged the sub-platter for a more sophisticated aluminium one.

The Ortofon Century is available worldwide for 2.990€ MSRP.

For further information please read the following pages and consult the product information sheets.

Ortofon Century

This newly released turntable comes, unlike most other The Classic offsprings, in an elegant piano black chassis. Together with the silver aluminium sub-chassis, this results in stunning aesthetics. The supplied cartridge is a limited

edition Concorde and marks the celebration of Ortofon's 100 years of existence. It is based on a Concorde cartridge, which was mostly used as a DJ system, but has its origins in HiFi. The Concord Century uses pure silver coils for best possible conductivity. As a result, the sound will be more open and more precise.

Sophisticated comfort

The Ortofon Century turntable comes fully equipped with a built in electronic speed control. Change from 33.3 to 45 rounds per minute with the ease of pushing a single button. Even if you have a collection of 78 RPM shellack records, we have got you covered. By manually placing the drive belt on the upper ring of the pulley and selecting the respective speed on the sub-chassis.

Pro-Ject was founded in 1991, during the onslaught of the compact disc and CD players, with the mission to offer the best analogue experience for reasonable prices. In a time where the digital audio media had been on the rise, and vinyl was declared as outdated and dead, Heinz Lichtenegger kept his belief in the simple but best way to enjoy music – turntables.

Our aim is to get as many people as possible into the wonderful hobby that is HiFi audio and to deliver a real stereo experience for the lowest cost possible. The best way to start there is with a proper turntable. We want to give the customers back the right to choose what they need, without overblowing our products with unnecessary features.

Here at Pro-Ject we strive to create astonishing products with impeccable value. We only use the best components for the price and manufacture our handmade goods solely in Europe. With an eye for future trends we are always trying to fit the needs of the market.

Our passion and drive has been recognized by many acclaimed magazines. We have won multiple awards from the renowned HiFi press for our turntables and electronics over the years. Our products have also been used in countless TV shows and movies.

With cutting edge technologies and machines, we are able to create visually pleasing products without losing the eye for the finest details. We are closely working with partners of the music industry, such as Universal Music Group (The Beatles), Third Man Records (Jack White), The Rolling Stones, Parov Stelar or the world famous Hard Rock Café. Many industry leaders also cooperate with us, like the Vienna Philharmonic Orchestra or Ortofon for their jubilees. With these partners, we create special limited edition products to give our customers even more choices.
