

Ringo Starr Peace & Love

Artist Collection turntable

MSRP 499€ (incl. VAT)

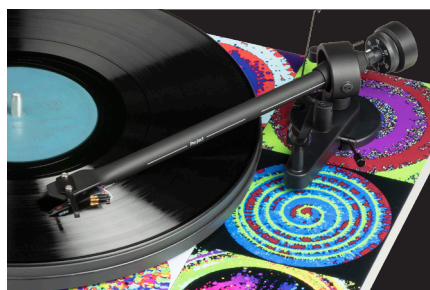

- Special edition of Essential III
- Artwork designed by Ringo Starr himself
- Acrylic platter
- Belt drive with synchronous motor and silicone belt
- Diamond cut aluminium drive pulley
- Chassis made of resonance insensitive MDF
- Integrated DC-powered motor control minimizes motor vibration and guarantees speed stability
- Low tolerance platter bearing & stainless steel spindle
- 8,6" aluminium tonearm with sapphire bearings
- Ortofon OM10 cartridge pre-mounted
- High-quality semi-balanced Connect it E phono interconnect with gold-plated RCA connectors included
- Special decoupling feet
- Dust cover included

Speed: 33, 45 (manual speed change)
Drive principle: belt drive
Speed variance: 33: 0,70% 45: 0,60%
Wow and flutter: 33: 0,21% 45: 0,19%
Platter: 300mm acrylic platter
Main platter bearing spindle: stainless steel
Tonearm: 8,6", aluminium
Effective arm length: 218,5 mm
Overhang: 22,0mm
Effective tonearmmass: 8,0 g
Suitable cartridge mass: 3 - 5,5g
Tracking force: 0 - 25mn (recommended for OM10 15mN)
Included accessories: power supply, dust cover, felt mat
Power consumption: 4,5 watts max
Dimensions: 420 x 112 x 330mm (WxHxD)
Weight: 5,0 kg net

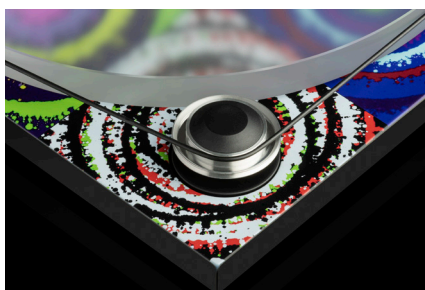

The Ringo Starr Peace & Love - 30 Year-Anniversary for Ringo Starr & His All-Starr Band

This collaboration between Pro-Ject Audio Systems and the Universal Music Group celebrates the 30th anniversary of Ringo Starr & His All-Starr Band. This incredible live rock-supergroup has now been consistently touring for three decades and sees Ringo Starr collaborating with handpicked artists and friends to put on a show unlike anything else. Much in the same way, this special turntable was also „handpicked“ by Ringo.

At its base lies an Essential III, upgraded with an acrylic platter, right out of the box. It features high quality and audiophile components, such as an Ortofon OM10 cartridge, a precision diamond cut aluminium pulley, top notch MDF chassis and a built in motor control for optimal speed stability. The acrylic platter is not just a sound enhancement that makes the turntable sound richer and more natural by eliminating unwanted resonances caused by the platter, it also allows you to view the underlying, stunning artwork.

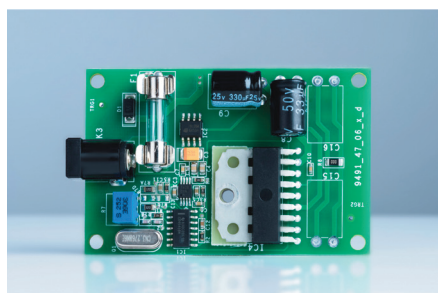

One piece 8.6" aluminum tonearm
Cartridge: Ortofon OM10

Diamond-cut aluminum drive pulley:
precise power transmission

Main platter bearing with low tolerances:
reduced rumble, reduced wow & flutter

Built-in DC-powered motor control:
better speed stability with
minimized speed drift

Ringo Starr designed the turntables's art-
work himself

High-quality semi-balanced Connect it E
phono interconnect

The artwork itself is designed by Ringo Starr and was carefully created and developed by him over the course of many years. It has grown with him and shows his dedication to love, togetherness and care. Those values have always been with him, they are reflected in his All-Star Band and this turntable continues to be another statement of exactly that. The turntable comes with a dust cover and a high-quality Connect it E phono-RCA cable.

It allows you to connect the turntable to an external phono preamp of your choice. External preamps can provide a better audio experience than the ones that are often built-in into the turntable chassis itself. This way you can match this incredible sounding turntable with an equally stunning phono stage and not miss any of the detailed nuances and intricacies of your favourite vinyl records.
