

CD Box RS2 T - The revolutionary CD-player

As you may recall: We have always been crazy and making products and investments which are not particularly mainstream. As everybody was going in CD, we were starting with turntables!

Now as everybody goes in streaming, we invest in a new revolutionary CD-player.

I personally believe in listening to music consciously. Also, I believe that a certain group of people simply wants the physical medium in their hands.

That's true for analogue.

But I think that's also true for CD!

I am sure everybody will put the majority of his/her CD's on a hard drive or put them into their base-ments, as they did with their analogue records and, on a day by day basis, listen to a streaming service. BUT: Many people want to keep their best CD's and

for this they want to have a proper CD-player. Very good in quality, but not too crazy expensive.

As also known, real RedBook CD-players got rare, high-end mechanisms are not even existing any-more. The industry uses DVD or PC drives with a lot of servo electronics and software to get CD's working. More or less good, but not the best way.

We know today that the drive is essential for reading all the 16Bits out of the CD's and most CD-players are so bad, that they have never seen more than 10Bits.

No wonder that over time the CD might have gotten an unfavourable image compared to analogue records and streaming.

It was time to create a perfect, top class CD transport again.

CD Box RS2 T available for MSRP 2.499 € (incl. VAT)

Why transport?

Because most of today's owners of a Hifi stereo or AV system already have a very good DAC, so why add this and make it 50% more expensive?

So, we concentrated to make a CD transport - THE BEST EVER.

Luckily, I am living in Vienna and Vienna was one of the cities where Philips had its development department and many CD players and mechanisms were designed here. Also, luckily the gentlemen who were part of this epochal invention are still around, formed in a company called StreamUnlimited. We can say the pope of the CD-player today - Mr. Michael Jirousek - was helping to create the ultimate CD player.

Our new Pro-Ject CD Box RS2 T is based on the new ultimate CD Pro 8 drive, with sophisticated, super precise new levels of mechanical qualities to read out the BIT perfect signal.

We designed the very robust chassis and electronics around this drive, which carries the perfect signal jitter-free to its high variety of outputs.

We can say it's the best CD transport ever and the perfect partner for so many currently existing premium quality DACs.

All the best and warmest greetings from Austria!
Heinz Lichtenegger, CEO

The history of Pro-Ject

Pro-Ject was founded in 1991, during the onslaught of the compact disc and CD players, with the mission to offer the best analogue experience for reasonable prices. In a time where the digital audio media had been on the rise, and vinyl was declared as outdated and dead, Heinz Lichtenegger kept his belief in the simple but best way to enjoy music – turntables.

Our aim is to get as many people as possible into the wonderful hobby that is HiFi audio and to deliver a real stereo experience for the lowest cost possible. The best way to start there is with a proper turntable. We want to give the customers back the right to choose what they need, without overblowing our products with unnecessary features.

Here at Pro-Ject we strive to create astonishing products with impeccable value. We only use the best components for the price and manufacture our handmade goods solely in Europe. With an eye for future trends we are always trying to fit the needs of the market.

Our passion and drive has been recognized by many acclaimed magazines. We have won multiple awards from the renowned HiFi press for our turntables and electronics over the years. Our products have also been used in countless TV shows and movies.

With cutting edge technologies and machines, we are able to create visually pleasing products without losing the eye for the finest details. We are closely working with partners of the music industry, such as Universal Music Group (The Beatles), Third Man Records (Jack White), The Rolling Stones, Parov Stelar or the world famous Hard Rock Café. Many industry leaders also cooperate with us, like the Vienna Philharmonic Orchestra or Ortofon for their jubilees. With these partners, we create special limited edition products to give our customers even more choices.
