

VC-E & VC-S2 ALU: The revolution in record cleaning machines

During 2016, Pro-Ject Audio Systems' first vinyl record cleaner, the VC-S, revolutionised the affordable vacuum record-cleaning machine market. Never before had there been a fully powered and super-fast cleaning machine at such a low price. The success was amplified by the growing demand to maintain people's ever-growing vinyl record collections. After listening to the extensive feedback given by our customers over the past three years we have learnt a lot about this market, resulting in the release of two new products.

The new machines introduced today, VC-E and VC-S2 ALU, represent a huge evolution of our original design, and addresses everything we have learned over recent years. Our new machines boast:

Better cabinets

Better clamps

Easier operation

Less noise

Better overall experience

The VC-S2 ALU is a direct replacement to the original VC-S, but the VC-E has been replaced as an even more affordable, compact solution.

We hope that these two products will motivate more and more people to buy used records, as well as maintaining existing and new record collections. A good vacuum cleaner is a proven essential tool for not just record preservation, but also for maximum fidelity and enjoyment of your analogue music.

The history of Pro-Ject

Pro-Ject was founded in 1991, during the onslaught of the compact disc and CD players, with the mission to offer the best analogue experience for reasonable prices. In a time where the digital audio media had been on the rise, and vinyl was declared as outdated and dead, Heinz Lichtenegger kept his belief in the simple but best way to enjoy music – turntables.

Our aim is to get as many people as possible into the wonderful hobby that is HiFi audio and to deliver a real stereo experience for the lowest cost possible. The best way to start there is with a proper turntable. We want to give the customers back the right to choose what they need, without overblowing our products with unnecessary features.

Here at Pro-Ject we strive to create astonishing products with impeccable value. We only use the best components for the price and manufacture our handmade goods solely in Europe. With an eye for future trends we are always trying to fit the needs of the market.

Our passion and drive has been recognized by many acclaimed magazines. We have won multiple awards from the renowned HiFi press for our turntables and electronics over the years. Our products have also been used in countless TV shows and movies.

With cutting edge technologies and machines, we are able to create visually pleasing products without losing the eye for the finest details. We are closely working with partners of the music industry, such as Universal Music Group (The Beatles), Third Man Records (Jack White), The Rolling Stones, Parov Stelar or the world famous Hard Rock Café. Many industry leaders also cooperate with us, like the Vienna Philharmonic Orchestra or Ortofon for their jubilees. With these partners, we create special limited edition products to give our customers even more choices.
