

## Connect it Banana Set E

- Set of 4 pieces
- Ø 4mm
- Max. cable Ø 4,5mm
- Gold plated phosphor bronze conductor
- Transparent shell

**19,90 € MSRP (incl. VAT)**

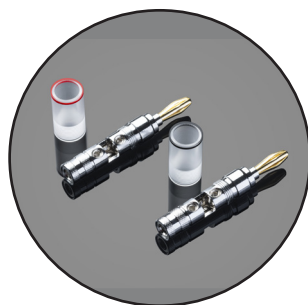

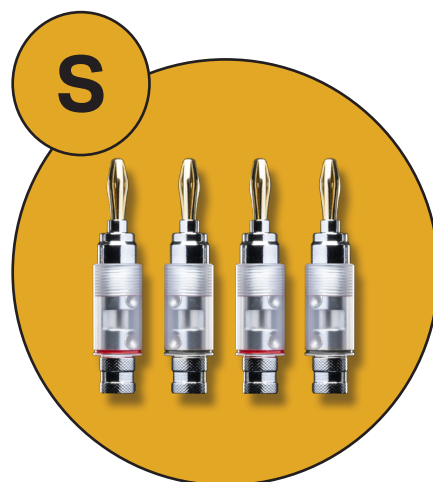

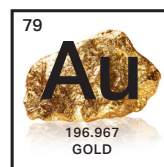

Non-conductive shell

## Connect it Banana Set S

- Set of 4 pieces
- Ø 4mm
- Max. cable Ø 6mm
- Gold plated phosphor bronze conductor
- Transparent shell

**59,90 € MSRP (incl. VAT)**

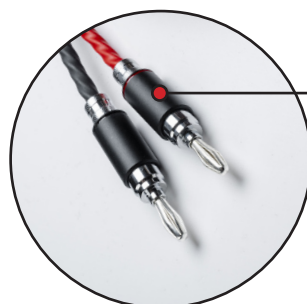

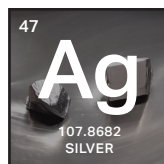

Non-conductive shell

## Connect it Banana Set DS

- Set of 4 pieces
- Ø 4mm
- Max. cable Ø 6mm
- Silver plated berillium copper conductor
- Black painted non-conductive aluminium shell

**69,90 € MSRP (incl. VAT)**

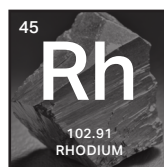

Non-conductive shell

## Connect it Banana Set RS

- Set of 4 pieces
- Ø 4mm
- Max. cable Ø 6mm
- Rhodium plated berillium copper conductor
- Non-conductive carbon shell

**129,00 € MSRP (incl. VAT)**

Non-conductive shell

## Non-conductive shell?

## Necessary for micro high-end amps!

The space on micro amplifiers like the Amp Box S3 or Stereo Box S3 BT as shown above is limited. Therefore, all the connection terminals are very close.

This can be a problem, especially for banana plugs, as they are usually bigger compared to RCA connectors for example. A conductive connector shell can lead to a short circuit if the connectors touch. The amplifier then goes into protection mode and with very bad luck you could possibly damage your amplifier.

Therefore, all our banana plugs got a non-conductive shell to prevent possible damage and let you enjoy your favourite music without any hesitation.
