

VC-E mini

Ultra compact record cleaning machine

MSRP 279€ (incl. VAT)

- **NEW** ultra compact cabinet design
- **NEW** suction from the bottom - no arm
- **NEW** Brushless DC vacuum motor
- Magnetic clamp for quick cleaning
- 4 mm aluminium composite cabinet
- Removes cleaning fluid residue free
- Built-in tank for vacuumed cleaning liquid
- Eco-friendly non-alcoholic cleaning fluid
- Removes static load of vinyl records
- Clamp seals record label from cleaning fluid
- Made in Europe

Cleaning speed:	30 RPM
Included accessories:	Brush Self-Adhesive Arm Strip Magnetic clamp Wash it 2 (100ml)
Power supply:	12V DC, 6A
Power consumption:	max. 60W
Dimensions:	230 x 155 x 185 mm (W x H x D)
Weight:	2,1 kg (without power supply)

Ultra-Compact Record Cleaning Machine

The VC-E Mini is an efficient, ultra-compact record cleaning machine designed for vinyl enthusiasts with a small sized record collection. Engineered and manufactured in Europe, it combines innovative design with great cleaning performance to keep your records in optimal condition.

Unlike conventional record cleaning machines that use a suction arm, the VC-E Mini introduces a bottom-mounted vacuum system. This new design simplifies operation, reduces mechanical complexity, and ensures effective fluid removal from the record surface with less noise compared to VC-E2 and VC-S3.

The VC-E Mini offers a modern, space-saving solution for maintaining vinyl collections, delivering top cleaning performance in an elegant and compact machine. It is suitable for occasional cleaning with a small record collection, making it ideal for casual collectors who want to keep their records in great condition.

Made in Europe!

At the core of the system is a brushless DC vacuum motor, providing strong and reliable suction while maintaining long service life and efficient operation. The vacuum system removes cleaning fluid thoroughly, leaving the record surface dry and residue-free after cleaning.

The machine includes a built-in tank for collected cleaning fluid, keeping operation clean and convenient. Vacuumed liquid is stored safely inside the unit and can be easily emptied when needed.

The VC-E Mini uses our eco-friendly, non-alcoholic „Wash it 2“ cleaning fluid, making it safe for vinyl while effectively dissolving dust, grease, and contaminants. The cleaning process also helps eliminate static charge, reducing dust attraction and improving playback quality.

A magnetic record clamp allows for quick and secure mounting of vinyl records. The clamp seals the label area to protect it from cleaning fluid, ensuring that only the grooves are treated during the cleaning process.
