SNR: 96dB (100 dB - ,A' weighted) at 4ohm
Channel separation: -67dB @ 10kHz
THD: < 0,12% at 5W / 4 ohms
Speakers output: 4mm banana plugs
Power supply: 22V/1A DC 100 - 240V, 50/60Hz
Power consumption in standby: <0.5W

From Passive to Smart in Seconds

The Wireless Box E is a **compact and versatile streaming amplifier** designed to transform **traditional passive speakers** into modern **wireless active audio systems**. By connecting directly to **speaker terminals of Pro-Ject loudspeakers**, it eliminates the need for a separate amplifier while **delivering powerful and efficient audio performance**.

For speakers from other brands, a **Connect it LS Flex extension cable** is available separately, expanding compatibility and making the system even more **adaptable**.

This flexibility makes the Wireless Box E an ideal solution for users who want to **upgrade their existing speaker setups with minimal effort, avoiding complex installations** or bulky equipment. Overall, it combines **modern wireless functionality** with straightforward usability, offering a **smart and efficient** way to bring traditional audio systems into the digital age.

Seamless Wireless Integration

Setting up the WiFi connection is a breeze. Just open the app and it **automatically detects your new Wireless Box E** and walks you through the **setup process**.

Featuring **Pro-Ject True Wireless Receiving** technology, the Wireless Box E can **receive audio directly from the Uni Box S3 and Stream Box E**. Once connected, audio signals from various source devices can be distributed wirelessly to **multiple Wireless Box E units** within the same network, enabling **flexible multiroom** playback.

You can **group multiple latest generation Pro-Ject & WiiM streamers***, build flexible **multi-room** systems and listen to your favourite vinyl records anywhere.

Pro-Ject Home

* Currently compatible with Stream Box E, Uni Box S3, Wireless Box E & WiiM devices.

Versatile Streaming Amplifier

The Wireless Box E is a **versatile device** that can be used in many different ways.

A pair of **Wireless Box E** connected to a pair of **passive speakers** creates a standalone, clean, minimalist **true hifi stereo** system. Nothing else is required. No speaker cables to manage. Complete freedom for speaker placement.

Designed for flexibility, your system can **evolve** at any time. Add a **Uni Box S3** or **Uni Box S3 Pre*** to introduce **analogue and digital inputs**, transforming your setup into a **powerful central hub**. Every connected source can then be **streamed**

wirelessly to your Wireless Box E speakers or to **multiple systems** throughout your home. **Challenging room layouts**, such as **large doorways** or **open living spaces**, become effortless to handle **without traditional cabling limitations**.

The system expands seamlessly into **Pro-Ject True Wireless Multi-Room Streaming**. The Wireless Box E makes it easy to build **elegant, cost-effective true hi-fi stereo systems** in **every room**. Each capable of **receiving the sources** connected to your **central Uni Box hub**.

Option 1: Wireless Hifi Stereo Streaming Amplifier

With a pair of **Wireless Box E** and a pair of **passive speakers** you can build **wireless true hifi stereo systems**. You'll have the **biggest freedom in speaker placement**. You only need one power connection for each Wireless Box and speaker combo, but managing the speaker cables is off the wire.

This setup option gives you access to **online streaming services and Bluetooth**. The streaming services and volume are comfortably controlled on your phone or tablet in our Pro-Ject Home app.

Option 2: Uni Box Hub Streaming System

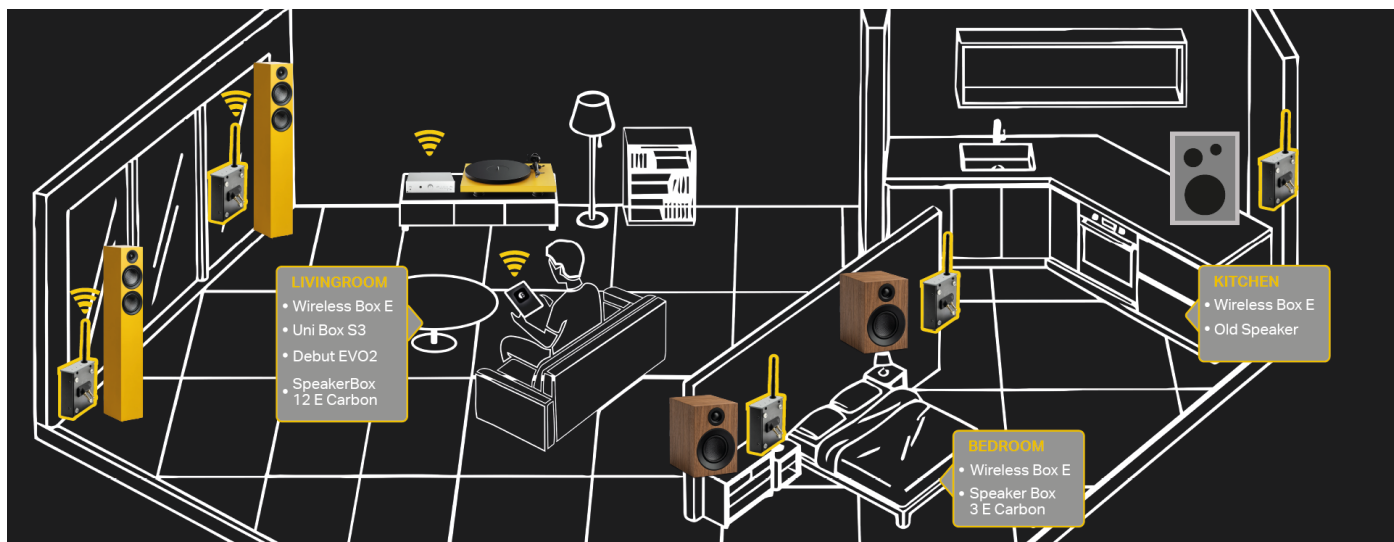

The **Uni Box S3** or **Uni Box S3 Pre*** are integrated streaming amplifiers or preamplifiers respectively. For **challenging large room layouts**, when speaker cable placement is impractical, the **Wireless Box E** can be added. The Uni Box is then able to **stream any analogue or digital input** directly to the Wireless Box E attached to the back of the speakers.

A beautiful solution for cable management and giving you access to **analogue, digital and streaming** all in a **modern hifi stereo system**.

* Uni Box E, Uni Box E Pre, Uni Box S3 Pre available in late 2026 and across 2027.

Option 3
Pro-Ject True Wireless Multi-Room Streaming

Multi-room functionality allows you to use multiple streaming devices across different rooms and control them from our Pro-Ject Home app. You can play the same music throughout your home for a synchronized listening experience, or stream different audio in each room independently. This creates a flexible, whole-home audio system that adapts to your listening preferences.

Whole-Home Hi-Fi. Seamlessly Connected.

Your **turntable in the living room**, connected to the **Uni Box S3**, becomes the **heart** of your entire home audio experience.

Stream your **vinyl collection** or **any digital source to every room** with effortless wireless connectivity.

Living Room: True High Fidelity Stereo Performance

The main system features the powerful **Speaker Box 12 E Carbon** for an **immersive, high-fidelity stereo listening experience**.

In this particular case, **large glass terrace doors** make **traditional speaker wiring impractical**. The **Wireless Box E** **eliminates the need for speaker cables** entirely. Enjoy **elegant, clutter-free** installation while **streaming true stereo sound wirelessly**.

Bedroom: Music Without Compromise

A refined setup with **Speaker Box 3 E Carbon** paired with **Wireless Box E** delivers rich, detailed sound in a **compact format**.

Stream your **turntable** or favorite **digital sources** directly to the **bedroom**. Perfect for **relaxed listening from bed**.

Kitchen: Vintage Meets Modern

Bring **new life** to your **favorite passive (vintage) loudspeaker**. The **Wireless Box E** discreetly transforms it into a modern **wireless active system**, staying **neatly hidden** while letting your classic speaker design **take center stage**.

Timeless aesthetics meet **contemporary streaming access**.

Streaming Services

Pro-Ject Home gives you access to all the **major and many smaller streaming services**. The Wireless Box E delivers stable, high-quality audio streaming across a wide variety of platforms, giving you seamless access to your favorite music with exceptional clarity and reliability.

You can **group** multiple **latest generation Pro-Ject & WiiM streamers** and build flexible **multi-room** systems*.

Stream Everything

Spotify, Tidal, Amazon Music, Qobuz, Napster, Pandora, TunesIn, Deezer, and many more.

Extension cable available separately

Performance and Connectivity

The integrated amplifier delivers **1 x 25 watts at 8 ohms and 1 x 50 watts at 4 ohms**, providing **sufficient power** for a **wide range of speaker configurations**. **Dual-band Wi-Fi connectivity (802.11 a/b/g/n/ac)** ensures reliable performance on both **2.4 GHz and 5 GHz** networks, supporting stable streaming even in demanding network environments.

Designed to **integrate effortlessly** within the **Pro-Ject ecosystem**, the Wireless Box E is fully compatible with products such as the **Uni Box S3, Stream Box E**, and other next-generation Pro-Ject streamers. WiiM streaming products are compatible too. This flexibility makes it a **future-proof addition** to any **modern audio system**, whether used as a **standalone solution** or as part of a **larger multiroom** setup.

The Wireless Box E features a **high-quality aluminium front panel** combined with a **robust metal chassis**, ensuring **durability and a premium look**.

The **speaker connectors** on the Wireless Box E allow it to be connected **directly to the back of many speakers**. It works with Pro-Ject speakers and many other brands. If it doesn't, a **Connect it LS Flex extension cable** is available separately, expanding compatibility and making the system even more **adaptable**.

* Currently compatible with Stream Box E, Uni Box S3, Wireless Box E & WiiM devices.
