

Harley-Davidson Turntable

NOT ONLY A DESIGN ICON.
A TRUE HIGH-END PERFORMER IN SOUND AND MECHANICS.

MSRP 2.590 € (incl. VAT)

- **Heavy Alu-MDF sandwich chassis construction** for best internal damping and rigidity
- **Heavy aluminium sub-platter**
- **Heavy, damped, zero resonance glass platter**
- **Super massive, 915g Harley-Davidson record puck**
- **Total moving drive mass of 2,75 kg** for consistently stable playback speeds
- **Belt drive with synchronous motor** and **Precision DC/AC power generator** for clean motor power
- **Sophisticated ultra-precision tonearm bearing and counterweight construction**
- **Gravity-based adaptive anti-skating system**
- **Height-adjustable metal feet with TPE damping**
- 8,6" S-shape aluminium tonearm with SME-headshell
- Hand-polished tonearm (1 day polishing)
- Pre-adjusted Pick it Pro (SRP 199€) cartridge
- 5P DIN output incl. high quality semi-balanced phono cable
- Electronic speed change 33/45 rpm
- Dust cover sold separately
- Leather mat for perfect record coupling to the platter
- Handmade in Europe

Speed: 33, 45 (electronic speed change)

Drive principle: belt drive

Platter: 300 mm glass with leather mat

Mains bearing: Stainless steel/brass

Tonearm: 8,6" S-shape aluminium with SME-headshell

Effective arm length / mass: 8,6" (218,5 mm) / 23,8g

Overhang: 18,5 mm

Included accessories: Leather it, Record Puck

Power supply: 15V DC / 800 mA (universal)

Power connection: 110/240 Volt - 50 or 60 Hz

Power consumption: 4W max / 0W standby

Dimensions (W x H x D): 543 x 124 x 437mm

Engineered to move you.

The collaboration between Pro-Ject and Harley-Davidson brings the „**mechanical soul**“ of the open road to your living space.

The turntable's design is a **tribute to iconic motorcycle craftsmanship**, featuring a silhouette inspired by the legendary **Bar & Shield** logo. By combining rugged materials like **polished aluminium** and **stainless steel** with a **genuine leather mat** reminiscent of a classic bike saddle the design captures the **industrial elegance** of a **Harley-Davidson cruiser**.

A true high end performer. Built without compromise.

This turntable is built to the same **uncompromising standard** that defines both brands. The plinth takes the **iconic Harley-Davidson shield logo** as its form, **machined from solid MDF** with **zero hollow spaces**, ensuring **maximum resonance damping** and a **dead-quiet noise floor** that lets your **music speak without interference**.

Capping it all is a **precision-milled aluminium top surface**, adding both **structural rigidity** and a cool **industrial contrast** to the organic shape beneath. Every edge, every curve is a deliberate nod to over a century of **American motorcycle heritage**. Reborn here as a platform for **pure high-end audio performance**.

Alu Sub-Platter & Glass Platter + Record Puck

2,75kg total drive mass for perfect speed. Diamond cut aluminium sub-platter and heavy glass main platter for exceptional acoustic performance.

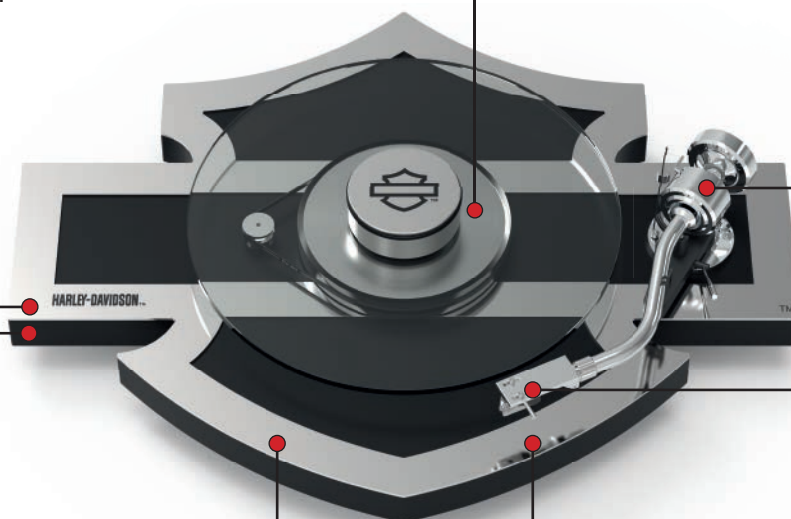

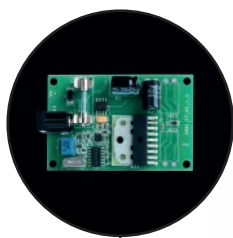

8,6" Alu S-Shape Tonearm

Hand-polished aluminium parts. Ultra-sophisticated bearing construction. SME headshell, high-purity copper wiring, TPE damped counterweight.

Precision power generator

The precision DC/AC generator powers the motor for smooth & clean rotation.

**33 / 45
RPM**

Electronic speed control

Easily change speeds with the push of a button.

Height adjustable damped feet

Three height adjustable TPE damped alu feet effectively decouple the turntable.

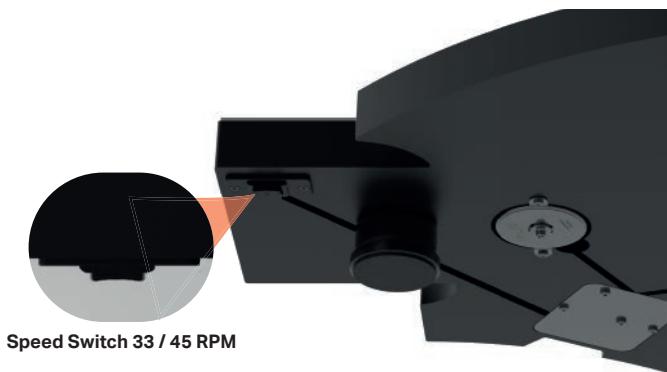

Pick it PRO

Pre-adjusted high-quality 199€ SRP MM cartridge - Made in Europe.

Find your groove. Hold your speed.

The Harley-Davidson Turntable's exceptional command over **precise and stable playback speeds** comes from **smart engineering** combined with sophisticated **low-tolerance precision manufacturing**.

The motor is powered by a **DC/AC power generator** that delivers **perfectly stable power**, free from ripple and distortion. The Harley Davidson Turntable does not use a cheap DC motor, but fully featured, **robust**, and **long-lasting, top-selected AC synchronous motor**. When supplied with stable power, the motor ensures **accurate and consistent rotational speeds** throughout their entire service life. The result is an **exceptionally stable motor speed**, with none of the fluctuations that cause wow and flutter - the subtle pitch inconsistencies that rob music of its timing, dynamics, and life.

Clear surface. Pure sound.

The **main platter** is crafted from **high-quality glass**, designed not only for **visual elegance** but also for **exceptional acoustic performance**. Glass is an **exceptionally inert material**, offering superior **resonance rejection** that keeps unwanted vibration away from your record. Its perfectly flat, hard surface ensures **optimal contact with the record**, allowing **every groove** to be tracked with **maximum accuracy**.

A **premium leather mat** is included and sits between the glass surface and your record.

All of these factors contribute to a drive system with a **total moving mass of 2.75 kg**, ensuring **optimal playback conditions** and **exceptional speed stability**.

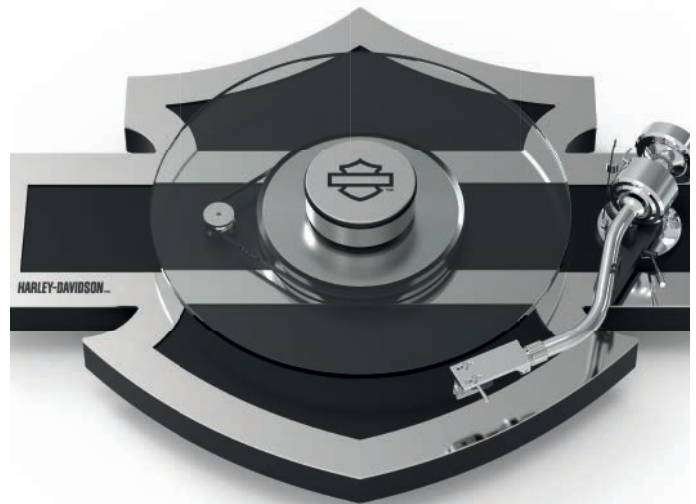

Precision „Mechanical Soul“

The **precision-manufactured aluminum motor pulley** and **aluminum sub-platter** are produced to extremely **tight tolerances**. Within one thousandth of a millimeter can be achieved using our **diamond-cut CNC machining technology**.

These tight production tolerances are **absolutely critical** for **speed accuracy** and **transferring the precise motor speed** to sub-platter and platter drive system.

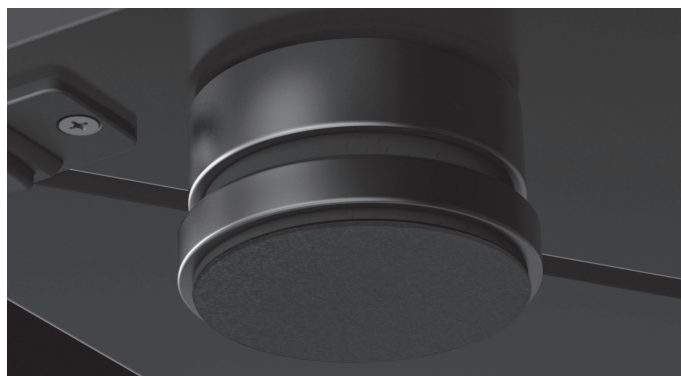

The **diamond cut aluminium sub-platter** is a **substantial upgrade** to regular plastic sub-platters. It **adds more mass** to the entire platter and drive system, resulting in **additional damping** of noise and **unwanted resonances** and improves short term **speed stability**, also called **Wow & Flutter**.

Height adjustable damped feet

The turntable rests on **height-adjustable feet**, each **damped with TPE** to isolate the turntable from the surface beneath.

Levelling matters more than most realise: a **perfectly horizontal turntable** is not a detail, it is a prerequisite, directly affecting channel balance, tracking accuracy, and the overall integrity of every record you play.

The Tonearm. Precision in Motion.

The Harley Davidson Turntable features a **sophisticated ultra-precision tonearm bearing** design. Its substantial **aluminum construction** is meticulously **hand-polished to perfection**, combining **striking aesthetics** with **exceptional mechanical performance**.

Ultra-low-friction pin-point bearings allow the tonearm to move **frictionlessly**, while the **TPE-damped counterweight** effectively **suppresses unwanted resonances** for **enhanced clarity** and **better tracking accuracy**.

The **SME headshell** with its **high-quality precision connector** ensures a secure fit and supports a wide range of cartridges, including **high-end moving-coil designs**. Completing the system is a sophisticated **adaptive gravity-based anti-skating mechanism** that automatically adjusts the effective anti-skating force across the record surface, maintaining **optimal tracking** and delivering the performance expected from a **true high-end turntable**.

**High-End Performance.
Iconic by Design.**

Pick it Pro

Cartridges are **electromechanical transducers**, where **mechanical energy** is transformed into an **electrical signal**. The real difference in sound happens here. The turntable itself should be as neutral as possible. The colour and life of the music come from the cartridge.

The included and factory preset Pro-Ject **Pick it PRO** cartridge delivers a **lively and robust** sound and convinces with its **wide dynamic range**.

Connected by quality.

Cables **preserve every detail and nuance** of your audio signal, ensuring that **nothing is lost** on its way to the receiving device, delivering the **full potential** of your sound system.

The included **Connect it Phono E 5P/RCA** is a high quality **phono optimized** cable. We focused on quality core materials like a copper conductor for a signal transmission without losses.

Upgrade to TRUE BALANCED

The Harley-Davidson Turntable is an **investment** for the future and engineered and built to handle **cartridge upgrades** with ease. Take the **TRUE BALANCED** Upgrade path. Get your True Balanced cartridge and cable now!
