TRUE WIRELESS
MULTIROOM

Multiroom Integration & Ecosystem

STREAM EVERY ROOM

Multi-room functionality allows you to use multiple streaming devices across different rooms and control them from our Pro-Ject Home app. You can play the same music throughout your home for a synchronized listening experience, or stream different audio in each room independently. This creates a flexible, whole-home audio system that adapts to your listening preferences.

Uni Box S3 | Versatile all-in-one amplifier with streaming

HEART OF YOUR AUDIO SETUP

The Pro-Ject Uni Box S3 is a versatile all-in-one amplifier designed to serve as the heart of your home audio setup. Combining modern streaming technology powered by WiiM OS with classic audiophile performance, it delivers clean, room-filling sound and extensive connectivity. Stream analogue sources, like your turntable, in every room.

Key features

- WiiM OS** • Native support for Spotify, TIDAL, Qobuz, Amazon Music, and web radio.
- Inputs** • HDMI ARC, Phono MM, plus digital and analogue connections.
- Wireless Streaming** • Transmit vinyl, TV, or external audio across your network.
- Power** • 2 x 40 W output @ 4 ohms.
- App Control** • Full functionality via the Pro-Ject Home App.

WIRELESS BOX E | Plug-in Streaming Amplifier

THE SMART LINK TO YOUR SPEAKERS

The Pro-Ject Wireless Box E is a compact, plug-in streaming amplifier designed to attach directly to passive speakers. It instantly converts any standalone speaker pair into a modern, network-enabled streaming system.

Key features

- Mount** • Attaches directly to speaker terminals via gold-plated banana connectors
- WiiM OS** • Native support for Spotify, TIDAL, Qobuz, Amazon Music, and Bluetooth 5.0.
- Power** • 1 x 25W/50W mono output (expandable to stereo).
- Multiroom Receiver** • Receives audio from Uni Box S3 or other Pro-Ject streamers.
- App Control** • Fully managed via the Pro-Ject Home App.
